Arabic — Native
English — Professional

EDUCATION

Computer Science
October 6 University

SEIF HOSSAM

Senior Full-Stack & Mobile Engineer

React Native · React · Laravel · Firebase

SUMMARY

Senior Full-Stack & Mobile Engineer with 3+ years of freelance experience designing and shipping production software end-to-end. Owns the full product lifecycle — requirements, system analysis, architecture, API design, development, store release and post-launch support. Builds offline-first mobile apps and scalable bilingual (English/Arabic) web platforms, with a focus on clean architecture, performance and maintainable code.

EXPERIENCE

Senior Full-Stack & Mobile Engineer

2023 — Present

Freelance

- Architected, built and published **VOLT FIT**, a production fitness & coaching app on Google Play, as sole engineer.
- Delivered client websites and web platforms end-to-end, from requirements to deployment, including Farida Marketing Agency.
- Lead system analysis and architecture for each project: data models, ERDs, API contracts and integration design.
- Build bilingual English/Arabic (RTL) products optimized for performance, security and search visibility.
- Own deployment, hosting and release pipelines (Firebase, Hostinger, GitHub Actions) and ongoing client support.

KEY PROJECTS

VOLT FIT — Fitness & Coaching Platform

Live on Google Play

- Offline-first cross-platform app (24 screens) with local persistence and real-time Firebase sync.
- Designed the state architecture with Zustand for workouts, nutrition and coaching flows.
- Workout tracking with automatic PR detection, macro nutrition tracker and 1RM calculator.
- Coach–client management system with role-based access and encrypted chat.

Stack: React Native, Expo, Zustand, Firebase (Firestore, Auth)

Farida Marketing Agency — Client Website

farida-eg.com

- Delivered a cinematic, fully responsive agency website optimized for speed and SEO.

Stack: HTML5, CSS3, JavaScript

E-Commerce Seller Dashboard

- React analytics dashboard with real-time data visualization, inventory state and sales reporting.

Stack: React, Chart.js, CSS Modules
